

Pre-Fabricated Energy Efficient Wall Systems

ULTRA—Our top of the line system designed for buildings that require maximum performance of air quality and humidity control. This system is well suited for these applications:

- Health Care Facilities
 - Laboratories
 - Food Prep
 - Libraries
 - Museums
 - Entertainment Venues
- **Framing System**— Structural Energy Stud, 37% less thermal transference than ‘C’ studs
 - **Sheathing**—Heavy duty, acrylic coated, aluminum faced sheathing with ‘Windlock’ fasteners
 - **Ice & Water Shield**—Note: panel shipped with ice & water shield to be **adhered** onsite so roof membrane can be shingled underneath
 - **Joint Tape**—Flexible butyl flashing @ seams, fasteners, brick ties & sill flashing
 - **Brick Ties**—‘Fero’ slotted stud tie (type 1), independently sealed to avoid contact with aluminum coating
 - **Spray Foam Insulation**— 3” x 6.4 R/inch = R value of 19, foam applied after panels have been installed
 - **Nailers and Brick Ledges** per details

Note: This panel shown is for masonry back-up—other panels specifically designed for cladding systems as specified.
